

PLATFORM TOUR

One ledger for programmes, treasury, and donor truth.

NGOBook unifies general ledger, banking, and grant dimensions so finance, programmes, and leadership operate from the same audit ready system from commitment through close.

Controls & approvals

Donor-grade reporting

Multi-office, multi-currency

Audit-ready close

ON THIS TOUR

What you will see in the next 15 minutes.

A concise walkthrough of how NGOBook keeps programmes, treasury, and donor truth on a single, controlled ledger built for mission driven organizations.

	01	Why NGOBook	The cost of fragmentation vs one shared truth.
	02	The platform	Twelve capability areas on one controlled ledger.
	03	Module deep dives	How GL, treasury, grants, FX, and payroll fit together.
	04	Governance & controls	Roles, approvals, and audit trails you can defend.
	05	Reporting & donors	Board and donor views generated from postings.
	06	Commercial model	Scoped quotes aligned with footprint and budgets.

OPERATING TRUTH

Fewer spreadsheets. More numbers that reconcile.

Finance, programmes, and leadership stop reconciling narratives to spreadsheets and start operating from one audit ready system.

One controlled ledger

Grants and dimensions ride on the same postings your auditors review not a side workbook, not a parallel tracker, not a month end export.

Treasury tied to the GL

Cash and bank activity reconciles into journals, with approvals before postings finalize. The bank position you see is the bank position you defend.

Reporting without shadow books

Board and donor narratives read from vouchers and history so the story matches the close, audit, and next month's plan.

Stop reconciling narratives to spreadsheets.

Fragmented tools create duplicate books and fragile close. NGOBook keeps operations, approvals, and reporting on one controlled platform.

The cost of fragmentation

- Month end becomes detective work who posted what, and why
- Donor reports diverge from the ledger; auditors ask, finance rebuilds
- Approvals live in email, chat, and signed PDFs never in one trail
- Leadership loses confidence in the numbers as variance grows

One ledger, shared truth

- ✓ Post once with the right dimensions; history and approvals stay attached
- ✓ Country offices work in policy aligned scopes with consistent controls
- ✓ HQ consolidates under one model currency, elimination, and all
- ✓ Boards, donors, and auditors see the same numbers your team closed

PART 02

The platform twelve capability areas on one ledger.

Four pillars (Ledger & grants · Treasury · Close & reports · Governance) organize the twelve modules that follow.

PLATFORM PILLARS

Everything NGO finance needs on one ledger.

Four connected pillars that turn your chart of accounts, grants, and office model into a single source of truth.

Ledger & grants

Chart of accounts, journals, funds, and projects with restrictions carried on every posting.

Treasury

Cash and bank reconciled to the GL with payment workflows you can defend.

Close & reports

Periods, trial balance, and donor schedules from the numbers operations uses.

Governance

Roles, offices, approvals, and trails for sensitive financial events.

MODULE 01

General ledger

The heart of NGOBook a multi currency, multi dimensional ledger designed for the realities of NGO finance: many donors per posting, restricted funds, and country office policies that must consolidate cleanly at HQ.

KEY CAPABILITIES

- ✓ Structured chart of accounts with unlimited analytical dimensions donor, grant, project, activity, cost center, office, department.
- ✓ Journal entries with maker / checker / approver separation, period locks, soft and hard close rituals.
- ✓ Reversals, accruals, recurring journals, and import templates sized for migration from legacy ERPs or spreadsheets.
- ✓ Inter company / inter office eliminations and a consolidated trial balance across offices and currencies.
- ✓ Every posting carries provenance source document, approver chain, and supporting attachments that travel with it.

SAMPLE ARTIFACTS

Trial balance · Sub ledger details · Journal listing · Chart of accounts export · Dimension balance · Period close pack

TIES TO THE LEDGER

The GL is the single source of truth. Every module on the next pages writes back into these journals nothing happens outside it.

MODULE 02

Treasury & banking

Cash, bank, and payment operations live inside the same database as the ledger no parallel spreadsheet, no Monday reconciliation, no nasty surprises at month end.

KEY CAPABILITIES

- ✓ Multiple bank accounts per office and per currency, each with signatory matrices and amount tiered approvals.
- ✓ Bank statement import (MT940, CSV, country specific formats) with auto matching of transactions to journals.
- ✓ Cash position dashboard today, tomorrow, and projected end of month across offices and currencies.
- ✓ Payment runs for domestic, cross border, and mobile money channels with dual approval before release.
- ✓ Petty cash, floats, and field office cash boxes tracked with liquidation workflows tied to advances.

SAMPLE ARTIFACTS

Bank reconciliation · Cash position report · Payment batch ·
Signatory matrix · Float register · Bank statement log

TIES TO THE LEDGER

Every payment and receipt posts to the GL with the right dimensions the bank position you see is the bank position you defend.

MODULE 03

Projects & budgets

Programme managers see the money in their language by project, activity, and budget line while finance keeps the same numbers in posting ready form.

KEY CAPABILITIES

- ✓ Multi version budgets (original, revised, latest) with variance analysis against actuals in real time.
- ✓ Budget vs actual by grant, project, activity, cost center, or any combination of dimensions.
- ✓ Optional budget check / budget hold at requisition time to prevent over commitment at the source.
- ✓ Forecasts, phasing, and reallocations tied to donor approved change controls not informal email.
- ✓ Shared programme finance dashboards one screen, two audiences, same numbers.

SAMPLE ARTIFACTS

Budget vs actual · Burn rate schedule · Variance report ·
Budget revision log · Phasing timeline

TIES TO THE LEDGER

Every budget line maps to a dimension combo on the GL, so 'plan' and 'actual' always compare like with like.

MODULE 04

Approvals & audit trail

Configurable workflows turn 'who approved this?' from an email hunt into an auditable trail every sensitive event carries a who, what, when, and why.

KEY CAPABILITIES

- ✓ Multi step approvals by amount, grant, cost center, vendor, or custom business rule.
- ✓ Delegation, out of office handling, and escalation paths without losing approval history.
- ✓ Immutable audit log of creations, edits, approvals, rejections, reversals, and voids.
- ✓ Sensitive events void, backdate, FX rate override, vendor onboarding have explicit guards.
- ✓ Export ready approval packs and segregation of duties reviews for auditors and donors.

SAMPLE ARTIFACTS

Approval matrix · Event audit log · Exception report · SoD review · Delegation history

TIES TO THE LEDGER

Postings cannot finalize without the required approvals the ledger and the approval log are the same story.

MODULE 05

Executive & donor reporting

Board packs and donor schedules read from the same postings that finance closes no shadow workbook, no Monday morning reconciliation.

KEY CAPABILITIES

- ✓ Donor shaped reports (FFRs, quarterly narratives, grant financial statements) driven by dimensions.
- ✓ Board ready KPIs: budget vs actual, utilization, liquidity, grant burn, and exception flags.
- ✓ Consolidated reporting across offices and currencies with configurable translation rules.
- ✓ Scheduled delivery to stakeholders by email or secure share with version control and watermarks.
- ✓ Export to Excel, PDF, and country specific donor templates without hand re keying.

SAMPLE ARTIFACTS

FFR · Board pack · Donor burn schedule · Management accounts · Audit schedule set

TIES TO THE LEDGER

Every figure in every report traces back to a posting so what you tell donors matches what finance closed.

MODULE 06

Multi office scale

From one country office to dozens. Offices work in policy aligned scopes; HQ consolidates under one model without copy paste spreadsheets.

KEY CAPABILITIES

- ✓ Office scoped users, approvals, currencies, and chart of accounts segments.
- ✓ HQ consolidation with elimination rules and translation at configured FX rates.
- ✓ Data residency and hosting choices per office where IT and risk require.
- ✓ Common master data (vendors, donors, grants) shared across offices where helpful.
- ✓ Per office close calendars that roll up to a group close with dependency visibility.

SAMPLE ARTIFACTS

Consolidation pack · Inter company ledger · Group trial balance · Close calendar

TIES TO THE LEDGER

Scope is configured on data and users, not bolted on so growing from one office to many does not require a re implementation.

MODULE 07

Grants & donor management

The award lifecycle from proposal budget to final liquidation lives on the same ledger that prepares your financial statements.

KEY CAPABILITIES

- ✓ Award master: donor, period, value, currency, restrictions, cost share, indirect recovery.
- ✓ Multi donor, multi period grants with sub awards, pass throughs, and partner reporting.
- ✓ Restriction tracking and release rules that govern expense eligibility at posting time.
- ✓ Grant burn rate, utilization, and maturity dashboards for boards, PMs, and controllers.
- ✓ Amendments, no cost extensions, and reallocations preserved with full revision history.

SAMPLE ARTIFACTS

Grant register · Burn rate dashboard · Restriction schedule · FFR · Amendment log

TIES TO THE LEDGER

Every eligible cost carries its grant, restriction, and cost share on the posting restriction checks happen inline, not in a workbook.

MODULE 08

Fund accounting

Restricted, temporarily restricted, and unrestricted funds with release rules built into the ledger not enforced by a controller's memory.

KEY CAPABILITIES

- ✓ Fund balances by classification, with opening, movements, and closing trails by period.
- ✓ Automatic net asset release when time or purpose conditions are satisfied.
- ✓ Inter fund transfers with approval and restriction checks before postings finalize.
- ✓ Reserve and designated fund tracking for boards, including policy ceilings and floors.
- ✓ FASB, IPSAS, and donor specific mapping layers supported same data, different lenses.

SAMPLE ARTIFACTS

Statement of activities · Fund balance roll forward · Release schedule · Reserves report

TIES TO THE LEDGER

The fund dimension lives on every line, so board and donor views of the same period tell the same story.

MODULE 09

Procurement & vendors

Requisitions, purchase orders, and vendor checks flow into the same approvals that protect your ledger procurement stops being a side process.

KEY CAPABILITIES

- ✓ Requisition !' RFQ !' PO !' goods receipt !' invoice !' payment, with three way match.
- ✓ Vendor master with sanctions screening, KYC documents, tax IDs, and risk flags.
- ✓ Approval thresholds by amount, category, grant, and donor eligibility rule.
- ✓ Commitment accounting against budgets before postings finalize no overspend surprises.
- ✓ Local content and donor eligibility markers where procurement rules require proof.

SAMPLE ARTIFACTS

PO register · GRN log · Vendor file · Sanctions screen report
· Three way match pack

TIES TO THE LEDGER

Commitments, accruals, and invoices all post to the GL with the same dimensions budgets are defended at the requisition, not at the audit.

MODULE 10

Payroll & staff costs

Salaries, consultants, per diems, and benefits allocated to grants and cost centers with the same audit trail as any other posting.

KEY CAPABILITIES

- ✓ Payroll processing for staff and consultants with statutory deductions and local tax rules.
- ✓ Cost allocation keys percentage, time sheet, or rule based splits across grants and centers.
- ✓ Per diem workflows with advance, liquidation, settlement, and reclaim where applicable.
- ✓ Benefits, leave provisions, and end of service accruals tracked and posted.
- ✓ Country statutory forms and donor labor cost rules (e.g. fringe caps) built into the flow.

SAMPLE ARTIFACTS

Payroll register · Allocation schedule · Per diem ledger ·
Statutory export · Accrual schedule

TIES TO THE LEDGER

Salary costs hit the GL with the same grant / project / cost center dimensions as any invoice donor labor reports write themselves.

MODULE 11

Multi currency & FX

Each office has a functional currency; HQ reports in a presentation currency; the ledger keeps both truths straight every day.

KEY CAPABILITIES

- ✓ Functional currency per office and a single presentation currency at group level.
- ✓ Daily, monthly, or custom FX rate tables with audit history and rate source tagging.
- ✓ Revaluation at period end for monetary balances, with automated journals.
- ✓ Realized and unrealized gains / losses booked with traceable, reversible entries.
- ✓ FX rate overrides for sensitive transactions always approved, always logged.

SAMPLE ARTIFACTS

FX revaluation journal · Translation adjustment · Rate table history · Override log

TIES TO THE LEDGER

Currency is just another dimension on the posting reporting in any of your currencies is a view, not a separate book.

MODULE 12

Cash advances & liquidation

Field advances, workshop floats, and travel per diems issued, tracked, and liquidated on the same ledger, not on a spreadsheet passed between offices.

KEY CAPABILITIES

- ✓ Advance request !' approval !' disbursement !' expense report !' settlement, end to end.
- ✓ Aging of open advances with auto reminders to holders and their managers.
- ✓ Liquidation with supporting documents, approvals, and posting to the correct cost center.
- ✓ Recoveries and payroll clawbacks for overdue advances with clear policy thresholds.
- ✓ Multi currency advance handling and FX treatment at settlement time.

SAMPLE ARTIFACTS

Advance register · Aging report · Liquidation pack · Recovery schedule

TIES TO THE LEDGER

Advances live as sub ledger balances; they clear to expense only at liquidation open float is always visible.

PRODUCT · DASHBOARD

One view of budgets, liquidity, and approvals.

The finance dashboard brings budgets, utilization, cash position, and pending approvals into one picture aligned with your general ledger and close process.

GOVERNANCE

Controls and audit trail you can defend.

NGOBook treats controls as first class: roles, approvals, and history are attached to every sensitive financial event.

Roles & segregation of duties

Least privilege roles per office; maker / checker / approver separation on postings and payments.

Configurable approvals

Thresholds by amount, grant, cost center, or vendor with escalation paths before posting.

Immutable audit trail

Every change carries who, what, when, and why readable for auditors and leadership alike.

Sensitive event guards

Voiding, backdating, FX overrides, and vendor onboarding trigger explicit, traceable workflows.

ECOSYSTEM

Finance that speaks the language of institutional donors.

Built for teams who answer to boards, auditors, and the institutional donor community where every figure in a report should trace to a posting.

20+

Reporting partners referenced across the system

1

Ledger for programmes, treasury, and reports

3

Official languages for boards and field offices

See the next slide for reporting partners referenced across the platform.

INSTITUTIONAL CONTEXT

Reporting partners referenced across the platform.

NGOBook is built for teams who answer to boards, auditors, and the institutional donor community. These are the organizations whose reporting cadences, cost share rules, and dimensional templates inform how the platform structures grants, restrictions, and schedules. Logos shown for context not endorsements.

PART 03

From first call to a confident first close.

We scope with your finance lead so procurement stays concrete offices, donors, hosting, and milestones in plain language.

IMPLEMENTATION

A calm, staged path your finance lead can steer.

Three phases, designed so your team stays in control of scope, data, and adoption.

01

Align on scope

Footprint, donor model, COA outline, and hosting constraints captured early before slides multiply.

02

Tailored quotation

Modules, support tier, and payment milestones packaged for budgets and governance cycles.

03

Deploy and adopt

Configuration, migration support, and training with your controller steering adoption.

PRICING & COMMERCIAL TERMS

Commercial terms that fit your footprint.

NGOBook is sold as a solution not a generic SKU. Offices, modules, hosting, and support are scoped with your team so quotes align with how you operate.

Start with a conversation

- ✓ Scoped quote: footprint, modules, hosting, and support tier in writing.
- ✓ Payment milestones aligned with budgets and reporting calendars where helpful.
- ✓ Implementation COA, migration, training owned with your finance lead.
- ✓ Security and data residency options reviewed with your IT or risk stakeholder.

Bring the right people

- ✓ Finance lead (CFO / controller / head of accounting)
- ✓ IT or security stakeholder if hosting matters
- ✓ Programmes or grants lead for award model discussion
- ✓ Outline of offices, donors, and reporting cadence

Answers buyers ask us first.

Q. Is NGOBook only for the largest INGOs?

No. It fits any mission driven organization that needs a serious ledger, treasury discipline, and grant dimensions from one country office to many. Scope can be phased as you grow.

Q. How do donor reports stay tied to the ledger?

Dimensions donor, project, restriction travel on every transaction. Schedules and narratives read from those postings, so what you tell donors matches what finance closed.

Q. How does commercial pricing work?

Quotes reflect offices, modules, hosting, and support not a public per seat list. Milestones can align with fiscal years and donor cycles. Terms are finalized with sales.

Q. What about hosting, security, and data residency?

Hosting options are part of implementation planning with your IT or risk team so they meet your security and jurisdictional requirements. We support cloud, regional cloud, and dedicated setups.

NEXT STEPS

Put finance and technology on the same roadmap.
